SuiteMed IMS
Integrated PMS / EMR / Patient Portal

SuiteMed IMS

Electronic Medical Records (EMR):

• Helps physicians record all information during a patient "encounter"; streamlines forms entry and retention

• Ensures physicians "code" all visit-related information correctly

• Transcription /voice directly into EMR and electronic signatures

• Rapid ROI

• Identifies possible drug interactions, provides e prescribing

• Secures patient records – no more paper charts to track (or lose!)

• Optimizes space in physicians offices (eliminates file rooms)

• Enhances patient care – more time with the patient, less time with administrative tasks, proactive health alerts and wellness issues

SuiteMed IMS

People and technology enabling the most efficient, effective, and affordable management, utilization, and access to patient information for ambulatory health care providers.

SuiteMed IMS

SuiteMed Basics

- Founded 1998 – Privately held and self funded
- Financially secure company

- Device Interfaces – ECG, Vital Signs, Spirometry and more
- Client Server & ASP applications

SuiteMed IMS

Choice of Input Devices

SuiteMed IMS

SuiteMed Features

CCHIT 2008 Certified

Point of Care Documentation

Clinical Messaging / Work flow

Prescription Management & E-Prescribing

Document & Image Management

Patient Education Materials

E & M Coding Support

Lab Interfaces, Device Interfaces, Clearing House Interface

Supports Health Quality Measures - PQRI

Comprehensive Letter Generator

Outcomes Analysis and Report Generation

Most Powerful and Flexible Product in the Industry

SuiteMed IMS

SuiteMed Advantages

Product / technology advantages

• Client Server & SaaS (ASP) models

• Ease of implementation / use (over 26 medical specialties)
Pediatrics, OB/GYN, Family Medicine, Allergy, Pain, multi-specialty clinics, etc.

• Certification (CCHIT 08)

• Moderately priced / low cost of use

• Interoperability

Services and support advantages

• Local support and technical training reinforced with main company support

• Personalized by phone / Web / email / IM sessions

• Ease of learning

• On line training modules

• Web & On site training

• Consistent refinements during past 12 years and ongoing

SuiteMed IMS

SuiteMed Advantages

Data Accuracy
- Reduces risk of transcription errors
- Reduces risk of missing critical information
- Reduces delays from primary care physician to hospital

Cost Savings
- Reduces charges associated with data entry for H&P information
- Eliminates transcription costs associated with H&P information
- Minimizes costs with paper (storage rooms, paper, printing, staff time)

Operating Advantage
- Simplifies patient chart / record management
- Provides perpetual access to patient records
- Enhances process automation
- Ease of integration with hospital systems
- Conversion of data from numerous systems to SuiteMed format

SuiteMed IMS

Implementation / Training / Support

http://varportal.suitemed.com/suitemedvar/

The IMS implementation process has many checks and balances to ensure your software is registered, installed, and implemented efficiently.

Implementation usually takes four to six weeks. At the end of this period there will be a go "Go Live" that includes 2-5 days of on site time. We can speed up or slow it down based on the office learning curve and availability.

With our experienced staff we can usually get a good feel for how long the process will take after the first 2 or 3 on line trainings.

Our goal is to maximize the effectiveness to you, our client, of IMS while minimizing the overall costs of implementation through a smooth implementation process.

SuiteMed IMS

Web Portal

Secure Internet Patient Portal

Engage patients in their care

Increase patient satisfaction

Save time with prescription renewals, appointment scheduling, and e-visits

More time = increased practice revenue

Enhanced communication with your patients
